Background

Alternative Names	YWHAH; YWHA1; 14-3-3 protein eta; Protein AS1
Observed band	28
Human Gene ID	7533
Human Swiss-Prot Number	Q04917
Background	tyrosine 3-monooxygenase/tryptophan 5-monooxygenase activation protein eta(YWHAH) Homo sapiens This gene product belongs to the 14-3-3 family of proteins which mediate signal transduction by binding to phosphoserine-containing proteins. This highly conserved protein family is found in both plants and mammals, and this protein is 99% identical to the mouse, rat and bovine orthologs. This gene contains a 7 bp repeat sequence in its 5' UTR, and changes in the number of this repeat have been associated with early-onset schizophrenia and psychotic bipolar disorder.
